

DEW

ACOUSTIC LIGHTING SERIES

NGA

Form and function are the driving force behind the creation of DEW with an acute focus on architectural license and harmony. As a high performance suspended acoustic system it redefines artistic design potential in that the size, volume and colour of each cloud can be customised to suit any space, from small studio spaces and offices to large multi-volume auditoriums, galleries and reception areas.

The infinite assembly configurations offer unique results to each cloud allowing every environment to stand out as an architectural statement transforming ceilings and soffits into exciting, sound absorbing suspended landscapes.
