

# FLEXLINE RECESSED 5035

NGA5035

SPECIFICATION SHEET

## PRODUCT DESCRIPTION

A recessed aluminium profile designed for powerful general lighting applications. With a generous internal width and thermal mass, it accommodates higher-output LED strips and maintains performance. The wide flange conceals cut edges for a seamless installation, while the deep channel helps reduce glare and create a more uniform light effect.

## PRODUCT NOTES

- When selecting an LED strip for this profile, we recommend a minimum LED density of 120 LEDs/m to achieve homogeneous, dot-free illumination, depending on diffuser type.
- A minimum of 2 LED strip runs per metre is recommended to ensure uniform light distribution and eliminate shadowing.
- Diffuser light transmittance: Milky 65–70%, Opal 75%, Frost 85–90%, Clear 95%.
