

FLEXLINE SURFACE 1820

NGA1820L

SPECIFICATION SHEET

PRODUCT DESCRIPTION

A surface-mounted aluminium profile with a deep curved diffuser that narrows the beam angle to approximately 60°, creating a more focused light output. The profile is designed to minimise glare and provide consistent illumination, while also offering good thermal management. Ideal for applications requiring controlled lighting with a clean surface finish.

PRODUCT NOTES

- When selecting an LED strip for this profile, we recommend a minimum LED density of 120 LEDs/m to achieve homogeneous, dot-free illumination, depending on diffuser type.
- A minimum of 1 LED strip runs per metre is recommended to ensure uniform light distribution and eliminate shadowing.
- Diffuser light transmittance: Milky 65–70%, Opal 75%, Frost 85–90%, Clear 95%.
